

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

1. **(Currently Amended)** A fence assembly for a tablesaw having a work surface, a cutting tool disposed on the work surface, said fence assembly comprising:
 - a fence beam having first and second opposite sides for being slideably disposed on the work surface;
 - a first plurality of spaced studs projecting outwardly from said first side [with each stud extending] to [a] an enlarged head spaced from said first side;
 - an independent fence face having [a first plurality of spaced] an inner face engaging said first side and defining a plurality of spaced recesses therein with one of said recesses aligning with each of said studs;
 - each of said recesses extending into said inner face of said fence face to a bottom;
 - a plurality of plates with one of said plates being disposed in each of said recesses;
 - each of said plates including two end sections engaging said bottom of said recess and a center section between said end sections;
 - a plurality of fasteners disposed in said recesses below said inner face of said fence face and securing said end sections to said bottom of said recess;
 - each of said center sections defining a keyhole shaped slots each having an enlarged end for removably receiving and a narrow end for retaining said heads of said studs;
 - each of said recesses having a groove extending into said bottom of said

recess between said end sections of each of said plates and beneath said keyhole shaped slot in each of said center sections; and

said head of each of said studs disposed in said groove under said center section to removably attach said fence face to said fence[; and

a plurality of plates attached to said fence face with each of said plates presenting one of said keyhole shaped slots].

2. **(Previously Presented)** An assembly as set forth in claim 1 including a second independent fence face disposed on the other side of said fence beam and having a second plurality of keyhole shaped slots, a second plurality of studs extending from the other side of said fence beam each to a head spaced from said second side.

3. **(Previously Presented)** An assembly as set forth in claim 1 wherein said fence face extends above said sides of said fence beam.

4. **(Original)** An assembly as set forth in claim 1 wherein said fence face is metal.

5. **(Original)** An assembly as set forth in claim 1 wherein said fence face is plastic.

6. **(Original)** An assembly as set forth in claim 1 wherein said fence face is wood.

Claims 7-22. **(Cancelled)**
